## KARMA BEADS

Every bead is a visual masterpiece with individual significance. Cut from a variety of precious stones and made from high-grade Sterling silver, the intricate creations are manufactured by hand with precision craftsmanship. The creative designs stand for the beauty in life and focus positive energy. They also use the slogan 'Create your Karma'.

THOMAS SABO celebrates joie de vivre with the launch of the new Karma Beads! Inspired by a positive attitude towards life and an appreciation of the beautiful things in life, the new jewellery range is a celebration of positive energy. The key piece of the collection, the beautifully detailed 'Wheel of Karma' along with the 72 different Karma Beads designs allow wearers to create unique jewellery compositions that express their personal Karma style. Complementing the Karma Beads, THOMAS SABO has developed a new necklace and a bracelet crafted from 925 Sterling silver, opening up even more creative possibilities.

This is how the Karma Beads are worn: The Beads, or the 'Wheel of Karma', are added to new bracelets and necklaces which are fastened by means of a bead element. The beads are added as desired, with stopper elements varying the position of the beads on the bracelet. Regardless of whether adorned with just one bead or 'fully loaded' – the result is always a very personal item of jewellery.

As colourful as the spectrum of the rainbow the scintillating Stones and Pearls Karma Beads are strung together. From intense violet and clear blue through to deep black or even delicate mother-of-pearl – these high-quality decorative beads, including a few made up of precious stones, compliment any outfit or occasion.

The special thing about these beads: all Karma Beads have their own meaning and are made from the corresponding stone. For example, the violet amethyst is a variety of quartz. It is seen as a healing stone for skin impurities and swellings, and it is said to have purifying and inspiring properties.

Green heliotrope in turn is a variety of chalcidony and is characterised by small red inclusions of iron oxide. The myth therefore arose in the Middle Ages that the stone contained drops of the blood of Christ. It is said of the heliotrope that it endows the wearer with an even temper and cheeriness, and that it furthers concentration and has a soothing effect on anyone who is tired. Mother-of-pearl is said to have a strengthening and stabilising effect on the mind and to ensure confidence.
